- 2090 impact driver, 90 Nm with many accessories
- To loosen and tighten screws without the use of power tools
- Impact forces are converted into rotary motion
- The double-curved design is particularly efficient
- 5/16" hexagon socket take-up

To loosen and tighten screws without the use of power tools simply by the force of the impact. The Wera impact drivers have a particularly high efficiency thanks to their robust, double-curved design. Impact forces are converted into rotary motion. The use of compressed air equipment becomes unnecessary. The robust textile box offers a very compact storage option for these high quality tools.

Impact drivers

It has to be possible that even the most seized screw can be loosened. Impact drivers are the solution whenever manual power is insufficient and a pneumatic screwdriver is not to hand. The Wera impact driver has particularly high efficiency thanks to its robust double-curved design. Impact forces are converted into rotary motion and so there is no need for the use of pneumatic appliances.

No need for power tools

Seized screws can be loosened or tightened without power tools.

Highly efficient

The double-curved design is particularly efficient.
